

Adham Ahmed Khattab

Alexandria, Egypt | adhamkhattab04@gmail.com | +201062616070

Date of Birth: 22/7/2004 | LinkedIn | Github

Career objective

I am an enthusiastic undergraduate student pursuing a degree in Electronics and Communication Engineering. I am currently seeking internship opportunities in the telecommunications sector to apply my technical skills, gain hands on experience, and contribute to real-world projects. Known for being a motivated, adaptable, and detail-oriented individual.

Education

Bachelor of Engineering, Alexandria university, Electronics and Communication department. Alexandria-Egypt
Sept 2022 – present

Internships

Digital Egypt Pioneers Initiative - DEPI, Cyber Security Incident Response Analyst. Alexandria-Egypt
Nov 2025 – July 2026

- Assessing Threats
- Finding Security Vulnerabilities
- Fixing Security Vulnerabilities
- Preparing for Inevitable Attacks

National Telecommunication Institute (NTI), Cloud services and op-management. Alexandria-Egypt
Sept 2025 – Nov 2025

- Developed cloud adoption plans, and cloud application designs.
- Handled cloud operations and continuous monitoring of cloud services.

National Telecommunication Institute (NTI), Network infrastructure. Alexandria-Egypt
June 2025 – July 2025

- Routing & Switching
- VLANs & Inter-VLAN Routing
- IP Addressing & Subnetting (IPv4/IPv6)
- NAT, ACLs, DHCP, STP

Courses

CCNA by Eng. Abeer Hosny:

- Routing and switching

Programming C by Eng. Keroles Shenoda:

- C basics
- Arrays, Functions and pointers
- Structures, Unions, and Enum

Cybersecurity:

- CompTIA Security+ (SY0-601) by Eng.Ahmed Sultan on Netriders academy
- Red teaming Course on UDEMY by Hossam Shady

Telecom Basics:

- GSM, GPRS, EDGE from A to Z course by Eng. Waleed elsafoury on UDEMY

Skills

Technical skills:

Programming: Python, Java, C, C++, Git and Github.

Network: CCNA, CompTIA N+.

Operating systems: Linux (KALI), Windows.

Soft Skills:

Critical thinking.

Problem solving.

Languages: Arabic (Native), English, German

Projects

Software-Defined Radio Modulation Using MATLAB & USRP:

- Developed MATLAB code to interface with a USRP for signal detection and transmission.
- Implemented analog modulation schemes including DSB-SC, DSB-TC, SSB, FM, and PM.
- Modulated, and analyzed baseband and passband signals in both time and frequency domains.

24-Hour Digital Clock Design Using Logic Gates:

- Used a 555 timer to generate clock pulses for time counting.
- Implemented combinational logic using AND & OR gates for time control and reset logic.
- Interfaced 7-segment displays to visualize hours and minutes.
