SUMMARY

Software Industry and Multimedia student at Alexandria University with strong foundations in Java, C++, Python, OOP, Data Structures, and software development concepts. Interested in backend and software engineering, with hands-on experience in software, databases, web, and UI/UX projects. Solved 200+ problems on Codeforces and participated in ECPC. Currently seeking a Backend or Software Engineering Internship to gain practical industry experience.

EDUCATION

B.Sc. in Software Industry and Multimedia (SIM)

Alexandria University, Faculty of Science

Expected Graduation: 2027

CGPA: 3.8893 / 4.0

2023 – Present

Alexandria, Egypt

Science Section

Sidi Gaber Language School

2012 – 2023

Alexandria, Egypt

TECHNICAL SKILLS

Programming Languages

Java, C++, Python

Web Development

HTML, CSS, JavaScript

Mobile Development

Flutter

Core Concepts

Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving, Software Engineering Concepts

Databases

SQL, MySQL, Database Design (ERD)

Tools & Technologies

Figma, IntelliJ IDEA, VS Code

Software Testing

Test Cases, Unit Testing Basics, Black-box & White-box Testing

Familiar With

Git, GitHub, REST APIs, Postman, Docker, Cloud Basics (AWS)

CERTIFICATES

Python for AI

Alexandria University

ECPC 2024 (Egyptian Collegiate Programming Contest)

Participant

ECPC 2025 (Egyptian Collegiate Programming Contest)

Participant

Problem Solving for Programming

Coach Academy

Blender,VFX,CGI, Motion Essentials

SPIRITUDE LEARNING

UI/UX Design Course

CYBERGUARDX, Integrated Solutions LLC

PROJECTS

Hotel Reservation System (Team Project) | Java

Developed a hotel reservation system using Java and OOP principles, including room inheritance, booking functionality, and exception handling. Applied abstraction and encapsulation to improve system structure.

ProLingo – Gamified Programming Learning Platform | HTML, CSS, JavaScript, Figma

Designed the original mobile UI/UX of a gamified programming learning platform using Figma. Contributed to a team-based front-end web adaptation with redesigned desktop layouts using HTML, CSS, and JavaScript.

Data Structures Implementation (Team Project) | Java

Implemented key data structures including stacks, queues, and linked lists, with insertion, deletion, reversal, and merging operations using Java.

Clinic Database Management System | MySQL

Designed and implemented a clinic database system using MySQL, applying ERD modeling, relationships, and SQL queries to manage clinic-related data.

Knuth-Morris-Pratt (KMP) Algorithm Analysis (Team Project) | Python

Analyzed the Knuth-Morris-Pratt (KMP) string matching algorithm using Python through complexity analysis, worst-case testing, and execution-time evaluation.

Omouma – Maternal Healthcare Platform

Designed user interfaces and interactive prototypes for a digital healthcare platform, focusing on usability and user experience

COMPETITIVE PROGRAMMING

Solved 200+ problems on Codeforces and participated in ECPC training and contests, strengthening problem-solving, teamwork, and time-management skills.
